

LPG/CNG injection controller

TECH ONE

- » Compatible with up to 4 cylinder engines
- » **Fast and easy installation process.**
- » 3-wires digital control panel.
- » 24-pole connector
- » Semiconductor-based petrol emulators
- » Petrol addition function
- » Compatible with petrol injectors wide opening strategy
- » TECH and Standard tuning algorithm
- » **Innovative control algorithm TECH with ACTA autocalibration and AATA autoadaptation systems**
- » Additional corrections based on gas temperature, reducer temperature, gas pressure and RPM's
- » Bar chart and linear injection time difference maps
- » 3D injection time map
- » Non-volatile fault memory
- » **Additional idle speed mixture slider (TECH algorithm)**
- » Automatic recognition of Mazda injection strategy (TECH algorithm)
- » Auto-diagnosis, automatic installation fault detection
- » Wireless communication using BlueTECH^{XT} module
